New Course

PDEV 79405 - Workshop on Science Writing
GC: Thursday, 9:30-11:30 a.m., Rm. TBA, 0 credits, Dist. Prof. Azriel Genack, [CRN 28644]

This course is designed to teach essential structural elements and strategies for effective writing in the sciences at the level of an entire article, proposal or business plan, and on the paragraph and sentence levels. Key elements of grammar and style will be reviewed. Basic strategies for oral presentations will be discussed. Student will develop their skills by working on articles and presentations of their own research.

Open to all programs, especially for students in the sciences. Open to Physics students at level III, level II students allowed if they have accumulated 45 or more credits.
