Clinical Psychology @ Queens CUNY
http://www.gc.cuny.edu/Page-Elements/Academics-Research-Centers-Initiatives/Doctoral-Programs/Psychology/Training-Areas/Clinical-Queens
The Clinical Psychology Program at Queens College endorses a Scientist-Practitioner model of training focused on two interrelated core principles: acquisition of knowledge, skills, and experience of scientific psychology and competency-based training in the practice of professional psychology. The curriculum provides broad and general training in psychological assessment, intervention and research. Unique to this doctoral program is the complementary training in the principles of modern neuropsychology and neuroscience. The curriculum includes courses in ethics, statistics, experimental methodology, psychopathology, psychodiagnostics, diversity, psychotherapy, professional issues, clinical neuropsychology, neuroanatomy, and neurophysiology.

Students can carry out their research in either a clinical research or a basic neuroscience laboratory. Students complete their first year of externship training at our on-campus clinic, the Queens College Psychological Center. The Clinic provides a learning environment that integrates research and theory from the classroom, while developing professional competencies supervised closely by experienced and licensed faculty. Subsequent externships in New York area hospitals are followed by a one-year clinical internship. Small by design, the program ensures extensive attention and mentorship to each student.

ALUMNI

A recent survey of our alumni indicated that they were successfully practicing clinical psychologists, many in leadership roles. Half had clinical responsibilities in hospital settings or in a private practice, and half worked in clinical and research positions at academic medical centers, colleges or universities.

FACULTY

ADMINISTRATIVE FACULTY
Robert Lanson, PhD (Department Chair)
Nancy S. Foldi, PhD (Director of Clinical Training)
Renee D. Goodwin, PhD (Associate DCT)

CORE CLINICAL FACULTY
Joan C. Borod, PhD; Yvette Caro, PhD; Nancy S. Foldi, PhD; Renee Goodwin, PhD; Jeffrey Halperin, PhD; Valentina Nikulina, PhD,; Joel Sneed, PhD Jennifer Stewart, PhD.

ASSOCIATE FACULTY
at Queens College (or other CUNY campuses)
Richard Bodnar, PhD; Claudia Brumbaugh, PhD; Joshua Brumberg, PhD; Jin Fan, PhD; Sarit Golub, PhD (Hunter College); John D. Greenwood, PhD (Graduate Center); Alan Kluger, PhD (Lehman College); Andrea Li, PhD; Humberto Lizardi, PhD (Lehman College); Yoko Nomura, PhD; Carolyn Pytte, PhD; Laura Rabin, PhD (Brooklyn College); Robert Ranaldi, PhD; Justin Storbeck, PhD; Deborah Walder, PhD (Brooklyn College).

DIVERSITY

The Clinical Psychology program seeks qualified students and encourages members of historically underrepresented groups to apply. The program works closely with the Office of Equal Opportunity and Diversity Programs to recruit and administer fellowships and awards. As the program is situated in Queens – one of the country’s most diverse counties – doctoral students obtain invaluable clinical experience and are ensured to benefit from the diversity of ethnicities, cultures, lifestyle groups, and religions.

HOUSING

Queens College has student housing available on campus in the Summit Residence Hall. The Graduate Center Apartment Complex also offers affordable housing. Most students rent apartments in Queens, Brooklyn, Manhattan, the Bronx, or nearby Nassau County. Queens College maintains a listing of rentals in the Office of Student Organizations. Students relocating to the New York area can also contact current students for information about neighborhoods and types of housing and opportunities.

FINANCIAL ASSISTANCE

There are multiple sources of financial assistance available. The Graduate Center provides two types of five year fellowships for new students; Graduate Center Fellowships with a stipend, tuition remission and health insurance, and Tuition Fellowships with tuition remission. Many graduate students teach as adjunct instructors. Federally subsidized loans, the Federal Work-Study program, or employment provided through faculty grants or research opportunities at other institutions are also available. Students can be supported for conference registration, travel costs, and for dissertation fellowships. Please visit the CUNY website for further information:
