The Behavior Analysis Training Area of the City University of New York Doctoral Program in Psychology, located at Queens College, offers doctoral students in Psychology training in the experimental and applied analysis of human and animal behavior, including behavioral neuroscience and behavioral pharmacology. Students and faculty investigate a wide spectrum of behavioral processes, from environmental and neural perspectives, through lectures and experimental laboratory course work, advanced seminars, informal student-faculty discussions, practica, internships, and individual research projects. Faculty and students publish regularly in peer-reviewed journals on a wide variety of research topics. Faculty members serve on the editorial boards of major behavioral journals, and are strongly represented at major national and international conferences and organizations. The Behavior Analysis Training Area program is accredited in behavior analysis by the Association for Behavior Analysis and is seeking renewal for its licensure-eligibility in New York State.
