M.S. in DATA SCIENCE
Capitalize on the Data Revolution

Prepare for in-demand roles with our exceptional and affordable program.

- As a public institution, we offer a world-class education at a fraction of the cost of other universities.
- Top data scientists from throughout CUNY teach our courses and lead research projects. Master’s students take classes alongside doctoral students.
- The curriculum is 30 credits. Rigorous, relevant courses cover the most pertinent areas of data science—artificial intelligence, data mining, data visualization, social network analysis, natural language processing, and more.
- In the wake of COVID-19, with our highly flexible curriculum, all our courses are easily transitioned to virtual learning which provides opportunity for students to learn from any part of the world through various digital platforms.
- A capstone project—either a research project or an internship at virtually any type of organization in the New York metro region, including digital media, entertainment, finance, government, health care, and more—extends the learning beyond the classroom.
- We help students build a bridge between data science theory and its application in the fields that interest them—finance, digital media, forensics, social networking and more.

- All applicants for all master’s programs at The Graduate Center will be considered automatically for Dean’s Merit Scholarships. For more information, see www.gc.cuny.edu/mascholarships.

Admissions
Students with a strong academic background in computer science and related STEM fields are encouraged to apply.

For details of our Admissions Requirements, please visit the program information here at tiny.cc/DSadmissionrequirements

For applications, deadlines, and additional information about the admissions process: www.gc.cuny.edu/admissions

Our Spring 2021 application deadline: November 1st
