Dr. Donald B. Hoffman has been a practicing forensic toxicologist over forty years, including twenty seven with the Department of Toxicology of the NYC Office of Chief Medical Examiner. He has had extensive experience as an expert witness in forensic toxicology in both criminal and civil cases. In addition to the many years of teaching forensic toxicology and pharmacology on the undergraduate and graduate levels, he has lectured widely to law enforcement, fire investigation, legal, medical, environmental and other groups, and has served as a research advisor to both graduate and undergraduate students. He has co-authored many articles and commentaries in the field of forensic toxicology (a complete list available on request ).

He is also a member of Phi Beta Kappa Society
