Employment Innovations

- Rules
 - Hiring and Firing Guidelines
- Internal Labor Market Procedures
 - Job Posting System
- Substantive Innovations
 - Recruitment Program

Three Kinds of Results

- Intended Consequences Substantive Innovations
 - Increased Diversity
- Decoupling Rule-Based Innovations
 - No Change in Diversity
- Unintended Consequences Procedural Innovations
 - Decreased Diversity

Minority Men and Women in Management

Percent of Group Members Who are Managers, 2002

Personnel Guidelines and Procedures

Recruitment and Management Training

Method

- Fixed Effects for Workplace and Year
- Seemingly Unrelated Regression (correcting for correlated error terms)
- Robust to Cochrane-Orcutt Correction for Serial Correlation & Difference-in-differences Specification.
- Modeling log odds of Proportion of Group in Mgt. (logged to predict growth at low end of range)
 - Log odds (G)=Log (Pgi/1-Pgi), where Pgi is the proportion of a focal group in management.
- Controls for Everything
- **Effect of New Policy on Each Group**

Conclusions

- Guidelines Most Easily Decoupled – They Don't Change Routines
- Recruitment and Training Most Likely to Work – But Least Common
- Formal Internal Labor Market Procedures Most Likely to Backfire – They Change Routines But Emphasize Rules Over Substance
 - Regulation Protects Against That
