Event Listing

The Event Listing component shows up to 3 active events matching the filter(s) selected (and, not or).

- "Active" events are events for which the start date has not yet passed (for events with only a start date), and events for which the end date has not yet passed (for events with a start & end date).
- Events are sorted chronologically by start date, in descending order.
  - If the event has only a Start date, then as soon as its start date has passed, the event item will no longer appear on the site.
  - If the event has a start and end date, then as soon as the end date has passed, the event item will no longer appear on the site.

- If no filters are selected the button will display as "See All Events" and will link to the full GC Events Listing.
- If one or more filters are selected, button will display as "More Events Like This" and will link to prefiltered events listing matching the filters selected.
- If no events match the filters selected, the component will not display.

Used on:
- General
- Program Detail
- Department Detail
- News and Event Landing
