You are getting near the end …

After two decades in school …

… you are reaching the highest point that can be reached.
… you are reaching the peak of the highest mountain.

… so, what is next?

The Job Market
Forget about it, it’s too late for this year.
Forget about it, it’s too late for this year.

OK, so I exaggerated.

But it’s time to get moving. You have many decisions to make and revisions of your job market paper to make.

Cawley (reference list): If you are serious about an academic career, you should aim for participating in the "Job Market" and plan accordingly, because "All you need is that one damn paper" (Yusufcan Masatlioglu - U Maryland).
What is the “Job Market” in Economics?

• A matching process that places PhD economists in jobs.
  – Especially important for soon-to-be economists (by title)
  – Driven by the academic calendar

• Unlike some other fields, in economics the matching of soon-to-be Ph.D.’s takes place on a relatively strict schedule in the U.S.

• “Nearly all” U.S. positions are advertised in the JOE (Job Openings for Economists), as are some foreign positions.

More true for academics (and gov’t) than for private sector

• **JOE:**
  
  – Most US academic positions are announced in the JOE.
  – Only some of the US non-academic positions are announced in the JOE.
  – Foreign positions (academic and non-academic) tend to be the more prestigious than those advertised locally.

• **Placement is**
  
  – Highly competitive
  – Fairly hierarchical: students are not often being placed at schools ranked higher than where they receive their Ph.D. [Roth’s Trickle Down](#).
SPECIAL FOR THIS YEAR

Interviews
The AEA recommends that employers conduct initial interviews starting on **Monday, January 2, 2023**, and strongly recommends that all interviews take place virtually (e.g. by Zoom). We suggest that interviews not take place during the AEA meeting itself (January 6-8, 2023).

Rationale: In the past, interviews were conducted in person at the AEA/ASSA meetings. This promoted thickness of the market, because most candidates and employers were present at the in-person meetings, but had the disadvantage of precluding both job candidates and interviewers from fully participating in AEA/ASSA sessions.

Flyouts and offers
Flyouts and offers have historically happened at times appropriate for the employer, and the AEA sees no reason to suggest otherwise. We ask that all employers indicate on [EconTrack](https://www.aeaweb.org/news/member-announcements-2022-july-01) when they have extended flyout invitations and closed their searches. Unlike with interviews, the AEA does not take a position on whether flyouts should be virtual or in-person.
• **Job market institutions and mechanisms**
  Please keep in mind the various job market institutions and mechanisms created by the AEA to improve the job market:

• The JOE Network includes a database of job openings for economists.
  • Employers may sign up here: [https://www.aeaweb.org/joe/employer](https://www.aeaweb.org/joe/employer).
  • Job candidates may search the database here: [https://www.aeaweb.org/joe/listings](https://www.aeaweb.org/joe/listings).
  • The JOE Network has an electronic clearinghouse for job candidates to submit job applications. Job candidates may register here: [https://www.aeaweb.org/joe/candidate](https://www.aeaweb.org/joe/candidate).

• The AEA Committee on the Job Market releases data and guidance on the job market here: [https://www.aeaweb.org/joe/communications](https://www.aeaweb.org/joe/communications).

• EconTrack: a board on which employers can indicate when they have extended interview and flyout invitations, and closed their search: [https://www.aeaweb.org/econtrack](https://www.aeaweb.org/econtrack).

Jobs in the JOE: Reasons to be optimistic in recent years

• *Al Roth, in the Presidential address to the AEA in 2018 presented the good news this way (quoted in John Cawley, 2018)*
  
  \[\text{https://www.aeaweb.org/content/file?id=869}\]:

  • ...On the bright side, the ... basic fact is that there is a strong demand in numerous sectors for new economics Ph.D.s, and almost everyone lands a job that they like.

  • In a survey of economics job candidates from 2007 to 2010, job candidates received on average 16.8 interviews at the ASSA meetings, 5.7 flyouts, and 2.9 job offers (McFall et al., 2015).

  • By the end of summer, 92% of job candidates had accepted a job, 1.9% had received job offers but declined them all, and only 6% received no job offers.
• Candidates also tend to get the type of job they want; in the McFall et al. (2015) sample, 64% of job candidates got their top choice of sector (among: four year college, university, nonprofit/government, business/industry, and postdoc).

• Another 20% got their second choice, and only 7% placed into jobs they had ranked fourth or fifth out of the five types.

• In addition, more than two-thirds of respondents (69.1%) were either “very satisfied” or “extremely satisfied” with their placements; another quarter (24.4%) were “somewhat satisfied.”

• Another happy fact is that, since the year 2000, the real (inflation adjusted) salaries of new assistant professors of economics in Ph.D.-granting institutions have risen over 36%.
• In 2017-18, the salary offered to new assistant professors of economics by Ph.D.-granting institutions averaged $132,143 (Scott and Siegfried, 2018).

• Finally, National Science Foundation data indicate that Ph.D. economists have the lowest unemployment rate (0.9%) of any doctoral field, as well as one of the highest median salaries of any doctoral field.

Notes: Salaries are means of institutional means; not all institutions report at each rank every year. Individual faculty move among ranks from year to year. Includes salaries of faculty on leave; excludes visiting faculty. Calendar-year salaries converted to academic year by multiplying by 0.818. Standard deviations are in brackets. Growth rates are in parentheses.
COVID

In 2020 at this time, uncertainty and anxiety were building as to what the effect of COVID would be on the job market.

How bad would it be?

Indeed, very bad....
Figure 1: Number of Job Openings on JOE, All Types

See Communications from the Ad Hoc Committee on the Job Market
https://www.aeaweb.org/joe/communications
Figure 2: Number of Job Openings on JOE, Full-Time Academic Jobs in the U.S. Only
Figure 3: Number of Job Openings on JOE, Other Academic Jobs in the U.S. Only

Note: “Other” academic jobs includes visiting, temporary, part-time, or adjunct positions; that is, everything other than full-time positions.
So [in 2021] what did we predict for the upcoming year?

The committee was referring to evidence of a “major rebound,” so far. (Caution: it is early; these data are for week 17.)

Note: Committee is slow this year on these data. I used last year’s slides and added a notation of the total listing for each category for one date: 7/9/2022.
Figure 1: Number of Job Openings on JOE, All Types

Job Openings by Week (All JOE Sections)

2021 vs 2020: +53.67%

2021 vs 2019: -13.79%

Figure 7: Number of Job Openings on JOE, Other Non-Academic Jobs Only

Note: “Other” non-academic jobs includes temporary, part-time, non-salaried, or consulting positions; that is, everything other than full-time positions.
Another word of caution, the Committee last year reported data on the pace of “sign-ups” on JOE, which pace was falling behind that of previous years. Apparently, the many candidates were dropping out of the market during the pandemic.

To the extent that candidates were postponing market entry, they may have been an unusual rush of job-seekers during and since the 2021/2022 market cycle. This apparently was not a major factor in 2021-2022. We’ll see for 2021-2022, as more data accumulate.

Enough on the state of the market. Let’s talk about what you need to do.
# Job Market Schedule

<td>Job interviews*</td>
</tr>
<tr>
<td>Late January – April 2023</td>
<td>Fly-outs &amp; campus interviews*</td>
</tr>
<tr>
<td>Late March 2023</td>
<td>Scramble</td>
</tr>
<tr>
<td>May to August 2023</td>
<td>You deposit your dissertation</td>
</tr>
<tr>
<td>August 2023</td>
<td>You start your new job</td>
</tr>
</tbody>
</table>

* There will be no on-site interviews. Last year there were a few.
Preparation

• What does a job application contain?
  – Cover letter
    • Who are you? Case specific
    • Why would you like to work there?
    • Who is writing letters of recommendation for you?
  – Curriculum Vitae
    • We have a template ready. General
  – Job market paper
  – Research statement General
  – Academic Jobs: Evidence of teaching effectiveness General
  – Maybe: Statement about teaching “philosophy” General
  – Maybe: Sample syllabi General
  – Probably: Diversity statement General
Should you enter the job market?

- Will you be ready on Oct 1?
- Discuss with your advisor now:
  - How is your progress?
  - What is needed for the job market paper?
  - Will the job market paper be ready?
  - Will the ideas for the rest of your dissertation be in place?
  - Will you have preliminary work completed for the rest of your dissertation?
- Review again with your advisor in September
- *Your advisor needs to agree with you going on the market!*
Should you enter the job market?

• Will you be ready on Oct 1?
• Discuss with your partner / spouse / family now:
  – Explain your progress?
  – How long can they bear with you?
  – Are there financial and time constraints?
  – Are there constraints on the job search?
    • Location!?
    • New York is not the only city in the world.
    • The market for economists is nationwide / worldwide.
    • Joint labor supply!?
• Is your partner / spouse ready to move? To search for a job?*
• Where are those jobs located?*
  * Cawley, op. cit., has a section on married couple job search.
Getting the job market paper ready

- **Work, work, work** on job market paper.
- Reread, rewrite, polish.... **Repeat!**
- No typos! No grammatical errors!
- Get comments! Often!
  - Get comments from your advisor on successive drafts.
  - Present in the student seminar.
  - Get comments from people outside your own group.
- As soon as possible, schedule a job market paper presentation in the Fall Applied Economics seminar.
  - *The schedule will fill up very soon.* Some or most slots may already be taken as of now. **Alternatives:** diss. seminar, ad hoc seminars, brown-bag seminars,....
Non-academic job market

• True or False: “If I go to the non-academic job market, I don’t really need a job market paper.”

• True or False: “If I go to the non-academic job market, I can wait with my job search until I defend my dissertation because once I get hired I need to start soon afterwards, not at the beginning of the next academic year.”

• True or False: “If I go to the non-academic job market, I only need a job market paper: no syllabi, no teaching philosophy statement, no research statement.”
Preparation

• What else is there to prepare?
  – Website
    • sites.google.com (or somewhere off campus)
    • At CUNY-GC (but this will disappear after you graduate)
  – Dissertation proposal
    • Before you send out the first application letter!!!
    • Avoid putting the cart before the horse.
      – The dissertation committee is there to help you, so why write your dissertation (or even only your job market paper) before you defend your dissertation proposal.
    • Going on the market before you pass your dissertation proposal makes you look unserious.
  – Line up your references.
About the letters of recommendation

• Dissertation advisor
• Other members of dissertation committee
• Teaching references
• Reference letters are very important.
  – Letters from well-known professors carry more weight than those from less well-known professors (although well-known professors sometimes are less generous and less willing to write thoughtful letters).
  – Letters from professors outside your field carry less weight than those from inside your field.
• Typical letters will outline your research and discuss its potential importance. They also will discuss teaching, etc., if the referee knows about it.
• Writing letters needs time. Give references advance notice.
One more thought…

• Take responsibility for your job search.
  – The world isn’t looking for you. You need to look for the right opportunity … for any opportunity.
  – It is your future. → You search & You decide.
  – Don’t expect anybody to hold your hand and lead you to a job.
  – Job search is as demanding as teaching a new course (or two). But the only one who can do this work for you is the person in the mirror.
  – Others can help you, but only help you.

• Scary? We’ve all gone through it.

continued
In my view, the best reference about junior economist placement available is:

Site recommended by Johannes Pfeifer includes:

- Noah Smith (Stony Brook): How I survived the Econ Job Market
- Claudia Steinwender (LSE): Some insights on the job market
- Monika Piazzesi (Stanford): Tips on how to avoid disaster in presentations
- David Laibson (Harvard): Job Market Tips
- David Levine (Berkeley): Cheap Advice
- Chris Blattmann (Columbia): Academic Job Market Advice
- Peter Iliev: My Job Market Advice
- Amanda Y. Agan: Writing, Presentation, and Refereeing Advice
- Chicago Students: Economics Job Market Advice
- Harvard: Tips for Job Market
• **Webinar on the Economics Ph.D. Job Market**

• Part I (Asynchronous):
  - [Recorded video providing information on the job market timeline, institutions, etc.](#)

• Part II (Synchronous):
  - [Recorded video of the live Q&A held on November 11, 2021](#)

Watch out for National Association for Business Economists (NABE) Webinars. They have an annual meeting in October (Chicago, October 8-11)

If you have a financial economics specialty, look for the FMA meetings: Financial Management Association (Atlanta, October 19-22)
