How Do I Connect to the CUNY Wireless Network Using Windows 10?

Effective: October 23, 2019
Last Updated: October 23, 2019

1. Click on your Wi-Fi icon to bring up the list of available networks.

2. You will have the option to connect to CUNY, which is the secure network for students, faculty, and staff, or CUNYGUEST, which is for all non-GC users but is less secure.
3. When you click on **CUNY**, a pop-up will appear, requiring your **GC network credentials**.

4. Once you enter your credentials and click **OK**, the network will connect automatically.
5. If you connect using CUNYGuest, a browser page with the Sign-On page will pop up upon clicking Connect. Enter an already registered email address and the system-generated password. Be sure to check the “I agree to the terms and conditions” checkbox and click the Sign On button.

6. If you have not registered for the CUNYGuest Wi-Fi, click the “Don’t have an account?” link and complete the registration page. An email will be sent with a system-generated password.
