1. Go to Settings on your phone, then go to Connections.
2. Under the **Connections** settings, click on **Wi-Fi** and make sure it is set to **ON**. Once set to **ON**, you will see a list of available connections.

3. Now, you will have the option to connect to **CUNY**, which is a secure network for students, faculty, and staff. **CUNYGUEST** is for all non-GC users but is less secure.
4. When you click on **CUNY**, a pop-up screen will display, requiring your GC username (Identity) and password. The EAP method is **PEAP**, and the **CA** certificate should be set to **Don't Validate**. Enter your **GC network account** credentials and click on **Connect**. Nothing else is needed.
5. To connect using CUNYGuest, open Wi-Fi settings and select CUNYGUEST. Your phone’s browser will automatically open the Sponsored Guest Portal page. If you have already created an account, type in your previously registered email address and the system-generated password. Check the “I agree to the terms and conditions” and click the Sign On button.

To register a new session with CUNYGuest Wi-Fi, click the “Don’t have an account?” link to be redirected to the Create Account page. Complete the form and click on Register. You will be emailed a system-generated password that will remain active for 24 hours.
